DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1 and 3-7 are rejected under 35 U.S.C. 102(a) as being anticipated by applicants' own admission.

Applicants' specification acknowledges Fig. 3 as "Prior Art" and Fig. 3 illustrates a digital data filter circuit that calculates a DCT2N (DCT2N), that calculates and IDCT2N (IDCT2N) and that filters at least 2 odd transformed data items having the highest frequency in the set of transformed data (the filtering of W(7) and W(5) when W(7) and W(5) is greater than the predicted maximum frequency, note lines 24-29 of page 3).

Claim Rejections - 35 USC § 112

3. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are required to be rewritten in accordance with U.S. practice. An apparatus claim should be basically a combination of structurally interconnected elements. In claim 1 structure to carry out the "calculating" of lines 2 - 4 fail to be recited. The calculating step of

lines 3-4 are mis-descriptive because it is the filtered data that is inverse transformed. The phrase "intended to" makes the claim indefinite. The phrases "the odd transformed data item", claim 1, lines 7-8 and "the even transformed data item", claim 2, line 4; lack clear antecedent basis.

Drawings

4. It appears that Figs. 1-3 and 5a should be labeled "Prior Art".

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to DAVID H. MALZAHN whose telephone number is (571)272-3727. The examiner can normally be reached on M-Th from 7:30 to 6:00.
